

JOHN LODIE CRISOSTOMO

City of Santa Rosa | 0905-517-0786 | johnlodiecrisostomo104@gmail.com

PROFESSIONAL SUMMARY

Information Technology student and IT Department Student Assistant at Asiatech College with hands-on experience in full-stack web development using PHP, MySQL, HTML, CSS, and JavaScript. Delivered three working systems, including two for real clients, featuring OCR-based identity verification, third-party API integration, cloud storage, and role-based access. Strong in troubleshooting, technical support, and secure development practices.

WORK EXPERIENCE

Student Assistant, IT Department (Computer Laboratory) | *Asiatech College, Santa Rosa* | 2025 - Present

- Provide technical support and troubleshooting assistance for computer laboratory users
- Assist with daily IT department operations and equipment maintenance
- Support faculty and students with hardware and software issues

EDUCATION

Bachelor of Science in Information Technology | *Asiatech College, Santa Rosa* | 2025 - Present

PROJECTS

eRequest Mo: ACWBDS for City of Santa Rosa | *Capstone Project* | 2025 - 2026

- Developed a centralized web-based document request system that allows city residents to request documents online instead of visiting the office in person
- Automated resident identity verification using OCR on government IDs, confirming name, city residency, and age before account approval
- Added SMS OTP verification to confirm resident phone numbers and prevent fake registrations

Student Assistant Time Management System for Asiatech | *Client Project* | 2026

- Built a secure, role-based system for tracking student assistant duty hours for Asiatech College
- Implemented photo-verified Daily Time Record (DTR) submissions to ensure attendance accuracy
- Developed an approval workflow for Head Student Assistants to review and approve submitted hours
- Automated overtime (OT) cashout computation, reducing manual calculation

Asiatech Time Management System for Asiatech | *Client Project* | 2026

- Developed an HR system that imports time-in and time-out records from biometric devices
- Enabled HR staff to edit, set as leave, and mark attendance records directly in the system
- Automated detection and reporting of late, undertime, and overtime records
- Applied data cleansing to ensure imported biometric logs were accurate and consistent
